Wind power in China

Offshore wind power is a major part of China's clean energy development strategy. The country has a coastline measuring 18,000 kilometers long and is estimated to have up to 750 million kilowatts of offshore exploitable wind power resources. In 2012 China set the goal of 5 GW of installed offshore wind capacity by 2015 and 30 GW by 2020. However, development of offshore wind power did not come as fast as expect
