

Do you have an outdoor power supply at home

Overview

As we are dealing with electricity outdoors there is always the potential for it to come into contact with the elements, namely water and moisture. Due to this, an outdoor socket should be at minimum IP66 rated, making it water and dust resistant. Additionally, any outdoor socket MUST be. Where you sight your exterior socket is extremely important. You want to ensure it is in a place where it is easily accessible when needed, fixed. As an outdoor socket will be exposed to the elements e.g. water and moisture, to prevent it shorting out and causing untold issues with your home electrics it needs to be sealed and protected. To these ends, it should be at minimum IP66 rated meaning that it is waterproof. There are many different types of exterior socket available on the market today, some cheap, some rather more expensive. Generally as with. In terms of what products and materials should be used to wire up and outdoor socket, these are as follows: 1. Minimum IP66 rated outdoor socket with in-built RCD 2. Consumer.
