Solar Photovoltaic Cell Basics

The PV cell is composed of semiconductor material; the “semi” means that it can conduct electricity better than an insulator but not as well as a good conductor like a metal.

Photovoltaic Panel

A PV panel comprises multiple PV cells connected in series and/or parallel in order to achieve higher output power. The PV cell has a semiconductor structure, commonly silicon.

Products – Sedi

The SEDI Solar containers uses the unique SEDI light weight, ruggedized PV modules which are installed on a bespoke metal reinforced framework which is
