

New Zealand solar system export tariffs

Overview

New Zealand's Electricity Authority has introduced new rules to relax grid connection limits for solar and storage systems. Starting in late April 2026, residential solar and battery setups will receive a default export limit of at least 10 kW, with options for dynamic, flexible.

Our export buy-back rate is available to residential and small to medium size business electricity customers^ with network-approved generation equipment

Tariff classifications and rates

This information comes from the Working Tariff Document of New Zealand and you can look up this information on this website. If you use Customs software packages, you can download

When to use "new" and when not to, in C++?

You should use new when you wish an object to remain in existence until you delete it. If you do not use new then the object will be destroyed when it goes out of scope.

How does the new operator work in JavaScript?

The new operator uses the internal `[[]]` method, and it basically does the following:
Initializes a new native object
Sets the internal `[[]]` of this object, pointing to the
Function prototype
