

Uninterruptible power supply backup type

Overview

Perhaps the simplest example of a UPS with which we are familiar is the battery backup used in personal computers. Laptop and tablet computers are powered from an onboard battery technology such as Lithium-Ion that supplies the DC power to the computer's electronics. The power supply or UPS systems can generally be classified as being one of these five types: 1. Standby UPS 2. Line-interactive UPS 3. Standby-ferro UPS 4. This article provided an outline of the primary types of Uninterruptible Power Supplies (UPS) Systems. For information on other topics, consult our additional guides or visit the.
